Evening Brief

Date: Monday August 7, 2017

Weather Summary

Showers and thunderstorms will develop across the northern 2/3 of the Great Basin again on Tuesday. However, with increasing moisture, the majority of these storms will be accompanied by wetting rain.

Drier air will begin to spread into the southern and western Great Basin by midweek with continued showers and thunderstorms possible across the northern 2/3 of the region.

Preparedness Levels

Great Basin	3
National	4

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 13 fires for 229.41 acres; 9,078 acres large fire growth; 0 new large fires

Resources:

- Crews: 14 T1 IHCs in GB: 11 committed, 2 R&R.
 - GBCC has committed an estimated 83+ Type 3, 4, 6 engines.
 - 1-T1 and 6-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Near record fire danger indices for the time of year are being observed over the mountains of western Idaho with very high indices elsewhere across Idaho into northern Nevada. Values are much lower across the south and east. Fire danger will likely decrease across the northern half of the Great Basin as storms trend increasingly wetter through midweek. A drying trend is forecast for the southern portion of the area through at least midweek, allowing fuels to begin to dry in areas that have seen above normal precipitation over the last 30 days.

We have issued a Great Basin **Fuels and Fire Behavior Advisory for Nevada, Idaho and Utah**, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
